Experience

Senior Member of the Technical Staff
athenahealth

August 2015–Present
Watertown, MA

- Implemented one of athena's first microservices in an initial effort to replatform its monolithic codebase
- Organized a division-wide workshop and hackathon to publicize the Orders API and new platform knowledge
- Managed cross-team design and execution for a critical government certification initiative
- Created testing infrastructure and documented best practices for a mostly untested subsystem
- Reverse-engineered the API of an acquired application to integrate its data and users with the new Hospital product

Software Engineering Intern
Google

May 2014–August 2014
Mountain View, CA

- Assisted the Android team with both server and client work to implement a cutting-edge API (Nearby)
- Designed an interface for paginating large server responses, weighing the pros and cons of various approaches
- Added an `etag` parameter to improve client polling efficiency, saving an average of 1KB per request
- Refactored a legacy RPC to use a new, more encapsulated interface

Engineering Practicum Intern
Google

May 2013–August 2013
Mountain View, CA

- Tripled the speed of a long regression test used often by the Ads team
- Eliminated difficult-to-maintain Python code by generating it from an XML schema via script

Education

Pomona College

Bachelor of Arts in Computer Science and Minor in Classics

May 2015
Claremont, CA

GPA: 3.77

Bachelor's Thesis: Rust vs. D: Exploring Possible Successors of C++

Significant Coursework: Augmented Reality Independent Study, Database Systems, System Administration Seminar, Filesystems, Software Development, Artificial Intelligence, Domain-Specific Languages

Mentored: Artificial Intelligence, Computer Systems, Data Structures, Introduction to Computer Science

Honors: Pomona College Scholar, five semesters (top 25% of class)

Software Development Skills

Proficient: Java, Python, Rust, C++, JavaScript (ES6), TypeScript, HTML5, CSS3, SQL, Git, Docker, Scala, C, Perl, HL7v2

Familiar: Android, iOS, Amazon Web Services, \LaTeX , Haskell, FHIR

Activities/Interests

Open Source Contributor

January 2012–Present

- Commits an average of 1,000 times a year on GitHub
- Major feature and bugfix contributions to the Rust compiler & package manager (`rustc`, `cargo`), and `vim`
- Maintainer of `rust-rosetta`, an educational collection of RosettaCode solutions written in Rust
- Implemented a cycle-accurate emulator of the Nintendo Game Boy

Member, **Boston Rust**

November 2017–Present

- Attends monthly Boston Rust meetups held across Boston and Cambridge

Primary Organizer and Founding Member, **Claremont Hack**

October 2012–August 2015

- Organized the 5C Hackathon, a semiannual coding event focused on learning and inclusion with over 300 attendees
- Taught web development during Hack Week, a nightly seminar before the hackathon attended by 100+ students
- Served as chief liaison to tech company sponsors
- Promoted learning and collaboration between students across the Claremont Colleges

Experienced Latin Translator

Spring 2013–Present

- Contributor to Google Translate and the Latin translation of reddit and Facebook

Eagle Scout, **Boy Scouts of America**

August 2011
